6. Adjourn

Additional Information:

This is a special BPAC/Public Meeting being held to discuss the results of the St. Marys River *E. coli* monitoring study conducted by the U.S. EPA and the Michigan DNRE in 2010. The purpose of this study was to support Total Maximum Daily Load (TMDL) development in the St. Marys River and selected tributaries. Presented by Molly Rippke, Aquatic Biologist, Michigan Department of Natural Resources and Environment. At this meeting, regular BPAC meeting format and business will not be followed to allow all to focus on the presentation.
