DMMP STATUS

Of the approximately 150 navigation projects on the Great Lakes, 95 projects, which will be dredged within the next ten years, were identified as requiring review to determine whether continuing operations and maintenance of the overall project is warranted, and to determine the adequacy of dredged material site availability and capacity.

Investigations are underway at many of the harbors on the Great Lakes system. Following are the Detroit District Projects that require a detailed Dredged Material Management Plan:

District	Project	Scheduled Completion (FY)
Detroit	<u>Duluth-Superior Harbor, Michigan and Wisconsin</u>	COMPLETED
	<u>Green Bay, Wisconsin</u>	COMPLETED
	<u>Saginaw River, Michigan</u>	COMPLETED
	<u>Holland Harbor, Michigan</u>	COMPLETED
	<u>St. Joseph Harbor, Michigan</u>	2003
	<u>Grand Haven Harbor, Michigan</u>	2003
